LEAD GENERATION PLAN · BHAP

Getting BHAP More Site Visits and Bookings

A simple, video-led plan across Instagram, Facebook, Google and WhatsApp — designed to bring your projects **serious home-buyer enquiries and site visits**, not just phone numbers.

The idea, in one line

Nobody books an ₹80 lakh home off a brochure. So we show your projects the way a buyer actually experiences them — the location, the sample flat, the construction progress, the families already living there — to people in your city who are actively looking to buy. Then we make it very easy for them to book a site visit.

STEP 1

They see you

Project videos run on Instagram, Facebook and YouTube — shown only to people in your city, in your price band, who are likely to buy in the next few months.

STEP 2

They trust you

Price and payment-plan breakdowns, sample-flat tours, construction updates and RERA details answer their doubts before they ever speak to you.

STEP 3

They enquire

Three easy ways to reach you — WhatsApp, a one-tap form, or a project page. All three land in one place, with the project and source marked.

STEP 4

They visit, you close

Your sales team calls within 5 minutes, books a site visit, and we track which ads actually produced bookings — not just enquiries.

The one thing we ask you to judge us on: not "how many leads", but **how many site visits you got, and what each booking cost you.** Cheap leads are easy to buy; buyers who walk into your sales office are not. Everything in this plan is built around that difference.

1 The three ways enquiries reach you

Different buyers like to enquire in different ways. We run all three at once, because each one brings a different kind of buyer — and together they cost less than depending on any single one, or on brokers alone.

1. WhatsApp

They tap the ad and a WhatsApp chat opens with a ready message — "Send me the 2 & 3 BHK price list". The brochure and floor plans go out automatically.

BEST FOR
Buyers who want the price list right now

ENQUIRY QUALITY
High — they chose to start a conversation

COST PER ENQUIRY
Medium

YOU NEED
Someone replying within minutes, 7 days a week

2. Instant Form

A short form opens inside Instagram or Facebook — name and number already filled in. Fastest way to collect buyer details at scale.

BEST FOR
Volume — the widest reach of the three

ENQUIRY QUALITY
Mixed — so we add budget, BHK and "when do you plan to buy?" questions to filter

COST PER ENQUIRY
Lowest

YOU NEED
Discipline to call every one, fast

3. Project Page

A dedicated page for each project — location map, floor plans, price range, amenities, RERA number, then a "book a site visit" form.

BEST FOR
Higher-budget, research-minded buyers and NRIs

ENQUIRY QUALITY
Highest — fewest, but most serious

COST PER ENQUIRY
Highest

YOU NEED
The page built once per project; it then works until sold out

EXPECTED SHARE OF ENQUIRIES — AND WHAT EACH IS WORTH

WhatsApp · Instant Form · Project Page — based on a ₹1.5 lakh monthly ad budget

ROUTE	SHARE OF TOTAL ENQUIRIES	ENQUIRIES / MONTH	QUALIFIED ONES	COST PER QUALIFIED ENQUIRY
Instant Form		200–260	45–65	₹1,350
WhatsApp		90–120	30–45	₹1,100
Project Page		50–70	18–25	₹1,400
Total		**340–450**	**93–135**	**₹1,300 avg**

"Qualified" = budget matches the project, looking at the right configuration, and planning to buy within 6 months.

All three land in one place. Whichever way a buyer enquires, it arrives in a single list with the project and source marked, and an automatic WhatsApp message with the brochure, floor plans and a site-visit link goes out within 60 seconds. Nothing gets lost between platforms, and nobody on your sales team has to check three different inboxes.

2 The videos we will make

This is where the plan lives or dies. A 3D render of a tower looks the same as every other developer's render. A 40-second video of your site head walking through the actual sample flat, tape measure in hand, does not — and that is what makes a buyer visit your project instead of the one down the road.

Price & payment-plan explainers

"What ₹80 lakh actually gets you here." Carpet area, car parking, clubhouse, GST and registration — shown on screen, with the payment schedule.

OUR STRONGEST PERFORMER

Sample flat tours

Room-by-room walk-through of the show flat or a handed-over unit, with carpet area, BHK and price range on screen. The closest thing to a site visit from a phone.

PROOF OF QUALITY

Location & connectivity

Drone shot plus a real drive: "6 minutes to the metro, 10 to the IT park, 4 to the school." Location is the first question every buyer asks.

ANSWERS "WHERE IS IT?"

Buyer guides

"5 mistakes people make before booking a flat" · "Carpet vs super built-up, explained." You or your sales head, on site. Builds authority fast.

BRINGS NEW AUDIENCES

Construction progress

Monthly drone update and timelapse — slab by slab, floor by floor. Your answer when a buyer asks "will it be delivered on time?"

PROTECTS YOUR CREDIBILITY

Resident & buyer reviews

Families who bought from you, speaking inside their own homes, in their own language. Name and project on screen.

CLOSES DOUBTS

Offer videos

"Free site visit with pickup and drop this weekend." Straight to the point, one clear action, with the launch price or limited-unit offer. This is the ad that collects the enquiry.

DOES THE ASKING

Follow-up videos

Shown only to people who watched but didn't enquire. Covers bank loan approvals, RERA registration, possession timeline and the booking process.

SECOND CHANCE

Site diary clips

Raw phone videos from your site and sales office — today's slab, a family's site visit, the weekend crowd. Looks real, costs nothing, and platforms show them cheaply.

WEEKLY, FREE

Every video follows the same rules: shot vertical for mobile · the first 3 seconds do the work · subtitles on screen, because most people watch without sound · spoken in the local language, not brochure English · the locality named on screen, because local always beats generic · and the **RERA registration number shown on every ad**, as the rules require.

3 How many videos, and when we shoot

You do not need hundreds of films. You need two good shoot days at the start, then one shoot day a month — plus phone clips your own site and sales team send us for free.

TO START WITH
30 videos
from just 2 shoot days

AD VERSIONS MADE FROM THEM
55–60
same footage, different openings

EVERY MONTH AFTER
8–10 new
1 shoot day, batched with the drone update

FROM YOUR TEAM, WEEKLY
2–3 clips
shot on a phone, no cost

WHAT WE SHOOT	VIDEOS	WHERE	NOTES
Price & payment-plan explainers	3	Sales office	You or your sales head on camera
Sample flat tours	3	Show flat / handed-over unit	Show flat must be fully dressed and lit on shoot day
Location & connectivity	3	Drone + drive	Drone permission for the site — we handle the paperwork
Buyer guides	4	Site	Shot in one go, same day as the above
Construction progress	2	Live site	Drone and a fixed timelapse camera, refreshed monthly
Resident & buyer reviews	3	Buyers' homes	**Please line these up early** — slowest item to arrange
Offer videos	3	Edited	Cut from footage already shot
Follow-up videos	3	Sales office	You on camera, answering loan, RERA and possession questions
Site diary clips	6	Phone	Your site and sales team record these — we edit
Starting library	**30**	**2 shoot days**	**Ready before the first rupee is spent on ads**

Why we keep making new ones: the same video stops working after about 3–4 weeks — the same people have seen it too often, and your cost per enquiry starts climbing. The monthly batch is what keeps your cost flat instead of rising month after month. It also keeps construction updates current, which buyers notice.

4 What it costs

Everything is listed — the money that goes to Google and Meta, the video production, the management, and the tools. No hidden line items, and no brokerage on bookings.

ONE-TIME SETUP — FIRST MONTH ONLY

ITEM	WHAT YOU GET	COST
Starting video library	2 shoot days incl. drone, 30 videos, 55–60 ad versions edited	₹90,000
Project page	A dedicated enquiry page for one project — floor plans, pricing, location, RERA	₹30,000
WhatsApp & enquiry system	Auto-reply with brochure, one common enquiry list, call tracking, site-visit booking	₹20,000
One-time total		**₹1,40,000**

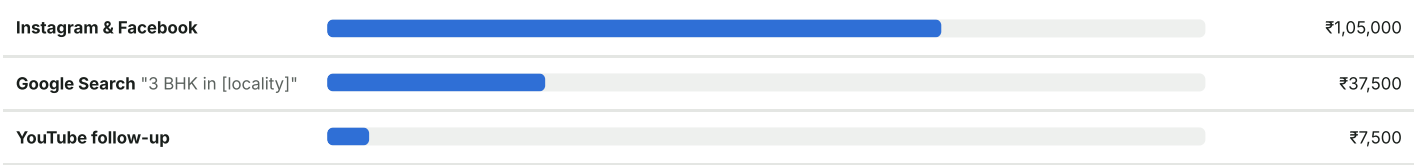

Each additional project page: ₹20,000.

MONTHLY PLANS — PICK ONE

MONTHLY ITEM	STARTER	GROWTH RECOMMENDED	SCALE
Ad budget — paid directly to Meta & Google	₹75,000	**₹1,50,000**	₹3,00,000
Video production — 1 shoot day + drone update + edits	₹25,000	₹35,000	₹45,000
Campaign management — running, testing, reporting	₹25,000	₹35,000	₹50,000
Tools — WhatsApp automation, enquiry system	₹5,000	₹8,000	₹10,000
Total per month	**₹1,30,000**	**₹2,28,000**	**₹4,05,000**

GST extra as applicable. Ad budget is billed by Meta and Google to your own account — you see every rupee spent. Minimum commitment: 3 months.

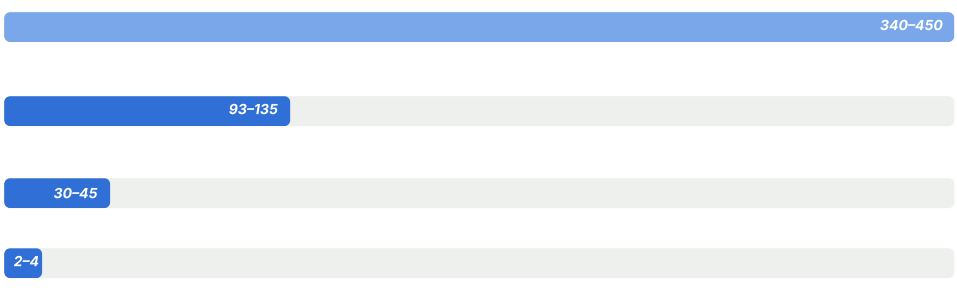

WHERE THE AD BUDGET GOES — GROWTH PLAN, ₹1,50,000

Roughly 70% of the budget runs on ads we already know work, and **30% stays set aside for testing** new videos, new localities and new angles. That is what keeps results improving instead of slowly getting worse. Google Search gets a bigger share here than in most categories, because home buyers search by locality and BHK before they ever see an ad.

5 What you can expect

Based on the Growth plan — ₹1.5 lakh of ads a month, for one project in one city. These are planning estimates from how this category typically performs, not a guarantee; we replace them with your real numbers from month two.

COST PER QUALIFIED ENQUIRY	COST PER SITE VISIT	FULL COST PER BOOKING
₹1,300	₹4,000	₹76,000
average across the three routes	ads only	everything included, at 3 bookings/month

Put simply: at a typical ₹80 lakh home, the entire monthly investment of ₹2.28 lakh is under 3% of a single booking — about what a channel partner charges in brokerage on that one unit. Every booking after that in the month is pure margin compared with the broker route. But please read month one as a learning month — home buyers take 45 to 120 days to decide, so month three is the first fair judgement of this channel.

6 How we start — and what we need from you

THE FIRST 90 DAYS

Weeks 1–2 — **Setup.** Project page built, WhatsApp automation with brochure connected, enquiry list created, shoot days locked in.

Weeks 3–4 — **Shoot & go live.** Two shoot days, 30 videos edited, ads switched on across all three enquiry routes.

Weeks 5–8 — **Tune.** We stop what isn't working, put more behind what is, and start showing follow-up videos to people who watched but didn't enquire.

Weeks 9–12 — **Grow.** Fresh videos and a drone update every month, and a full review: what each site visit cost, and which videos produced bookings.

WHAT WE NEED FROM YOUR SIDE

- **One person who answers, fast.** Every enquiry called within 5 minutes, weekends included — that is when buyers look. This matters more than anything we do on the ad side.
- **Access to the site and show flat** for the two shoot days, plus **3 past buyers** willing to speak on camera.
- **30–40 minutes of your time on camera** across the shoot days. Buyers trust the founder's face more than any actor.
- **Honest status updates on each enquiry** — called, visited, negotiating, booked or lost. This is how we teach the ads to find more of your actual buyers.
- **Price list, floor plans and RERA details** kept current, so every ad and auto-reply is accurate.
- **Patience for 3 months.** Long decision cycles mean early months always look worse than the truth.

WHAT YOU'LL GET FROM US

- A **weekly WhatsApp update** — enquiries, site visits, cost, what changed.
- A **monthly review call** with the full picture, in plain language.
- Every enquiry in **one shared list**, with project and source marked, that you own.

Prepared 11 October 2026. Figures are planning estimates for a single-city residential project at a ₹50 lakh–₹2 crore unit price, and are replaced with live account data from month two onwards.
